

A TYPICAL NETWORK DESIGN

Can we help make the Hospital Paperless ?

Our Clients

And Many More Hospitals...

Software Solution applicable to all patient-Care institution from small clinics to Multi-Specialty hospitals

DEEPTHI SOFTWARE SOLUTIONS
KEEPING IT SIMPLE

MEDICAL SMART OFFICE
COMPLETE HOSPITAL MANAGEMENT SOFTWARE

DeepthiSoft has built its success on clear and single-minded business policy: to deliver integrated software system that is competitively priced written with standard development tools, straightforward to use and capable of meeting the individual requirement of each customer.

The team at Deepthisoft the Heart of organization has been chosen for their significant experience in IT/Business and strong academic credentials. Their intellectual pursuit, maturity, creativity, self-confidence and innovative proficiency help us in looking beyond the present situation and to define the next wave in IT. Thus we are connected more to the future than to the past.

Why Computer Help in Health Care Sector ?

- * Medical professionals such as medical directors spend undue time and attention in managing routine administrative chores, leaving inadequate time to solve medical and clinical problems.
- * Hospital loose a certain percent (2-5%) of their revenue from paying patients because of service/materials not being correctly billed. This in time reflects adversely in their ability to provide free service.
- * Hospital can reduce their expenditure on drugs, medical supplies, test kits, X-ray films etc by at least 10% by proper inventory control.
- * Costly medical equipment is often under-utilized or even unused because of inadequate monitoring of maintenance and capacity utilization.
- * Nursing care can be very much facilitated if paper work is reduced. Test, drug, diet requisitions are automatic and up to dated patient data are available.
- * Medical audit, epidemiological analysis, community surveys, medical education and research are done with much ease in a structural way.

Benefits of Computerization in Health Care sector

- * Efficient procedures and methods executed duplication of efforts, delays and errors minimized Better patient service, Better Test Results, administration of medicines and nursing care.
- * Control of costs, control of wastages, Updated revenue expenditure, clerical staff will be reduced.
- * Better utilization of facilities, bed occupancy, vehicle use, OT's and equipment.
- * Elimination of revenue losses in billing, follow up on payments due.
- * Better Nursing care reduces paper work and use of nursing personnel.
- * Meaning full medication and research maintains the medical standards.
- * Efficient and informed management action keeps better planning, organizing coordinating, monitoring, controlling and evaluating of staff.

Medical Smart Office Features:

Easy Configurability to suit specific requirements

Easy can be learned to operate, even by a newbie in a few hours.

Multi-level user privilege settings.

User –Level access restrictions.

User events logging to monitor user activities.

Easy data backup.

Complete integrated solution of clinical, financial and administrative application s

Output from virtually any system in the healthcare enterprise can be collected and organized for secure storage and online retrieval output from Financial, Clinical, EMR and other common healthcare systems can be automatically.

Meets the challenges when it comes to confidentiality, information management and report distribution.

Electrical Medical record and generation of various reports that includes the following:

LIS (Lab Information System)

PACS (Picture Archiving Communication System) and

RIS (Radiology Information System)

Blood Information system

Modular

Operable with Minimum Training

Field proven quality & security

More than 100 detailed & summary MIS Report

Repository of utilizes like Email,FTP & HTML, PDF reporting

Export/Import of data from Ms-word & Excel

Lan Compatible

Intelligent Validation for each entry

User Defined data access

Data secrecy

Remote Access

CUSTOMER SERVICES AND SUPPORT

At DeepthiSoft we believe that delivery of effective customers. So our primary object is to provide channels of communication that enable users of our system to influence the future development of our products, in line with needs of their organization.
